Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Bradbury et al.

In regard to claim 1, 2, 4-7 and 10 the Bradbury et al. reference discloses a toxic waste handling “apparatus” 1 comprising a “collection chamber” 20 having an “inlet” (16, 18) and “outlet” 32, a “level sensor” 34, a “display panel” 44, a “pressure sensor” 150, a “measuring chamber” 24, a “pump” 106 and “controller” 40, as claimed.

In regard to claim 3, “solenoid valves” are inherent to the system in order to be electronically controlled (e.g., see valve 116).

In regard to claims 8 and 12, see column 4, lines 8-17.

In regard to claim 9, see column 3, lines 63-67.

In regard to claim 11, see column 3, lines 37-45.

In regard to claim 13, the vacuum line has a “baffle” 172 (i.e., a filter).

In regard to claim 17, gauge 168 gives the operator a “window” or visual indication of fluid level.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bradbury et al. in view of Sagona et al.

The Bradbury et al. reference discloses the invention substantially as claimed (discussed supra), but doesn't disclose having a "key pad" or "bar code reader" associated with the display panel. However, the Sagona et al. device discloses another fluid sample collecting device having a key pad 90 and bar code reader 40 for data entry of the patient for record storage and input commands. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Bradbury et al. device to have a key pad and bar code reader (if not already) as, for example, taught by the Sagona et al. reference in order to be able to input commands and collect data.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Hungerford et al. reference pertains to another fluid collection system having a keypad for user input, similar to Applicant's device.
